

LOG AMPLIFIER**■ GENERAL DESCRIPTION**

The NJM2204A is an integrated IF limiting amplifier which contains temperature compensated reference power supply, 6 stage differential limiting amplifier and 6 stage logarithmic suppression circuit.

Its voltage gain is 58dB and linearity is $\pm 1\text{dB}$ within 50dB log dynamic range. The voltage gain and log dynamic range are enlarged by connecting multiple stages.

The NJM2204A is suitable to telecommunication equipment.
